

**Lake and River Enhancement Program  
Division of Fish and Wildlife  
Indiana Department of Natural Resources**

**Aquatic Vegetation Management Projects  
Approve for Funding 2008-2009**

The DNR awarded \$724,973 in grants to survey and treat exotic invasive plants in 48 lakes in 13 counties. Eighty percent of the lake associations that requested funding received awards. Ray said that highest priorities included eradication of new exotic species introductions in Lake Manitou and Griffy Lake and follow-up control of other invasive species in those lakes; follow-up control for lakes previously funded for fluridone treatments and some new fluridone treatments; and maintenance treatments in lakes with new 2007-11 management plans and other lakes that have received past funding in two years or fewer.

No new aquatic vegetation management plans will be funded for 2008 in order to complete a three-year herbicide treatment cycle for lakes that already have plans.
